

## LINE MEASURE 1000

Accurate offers Calibration solutions for Measuring tape & Scales through their instrument "LineMeasure 1000". In the field of engineering Measuring Tapes & Scales play an important role & the precision are important for marking large components correctly. Scale & Tape are widely used for measurement in the field of civil, mechanical & textile industry.

The instrument calibrates tapes & scales with high precision for maintaining high standards of measurement. Different sizes of Tapes & scales can be calibrated upto 1000 mm.

### Features

- Meets IS 1269 Part 2 requirements
- Higher accuracy & repeatability
- The machine base is designed to ensure frictionless when tapes are stretched under tension of 50 N & above.
- DRO has data saving facility for future reference
- High accuracy CCD Camera

### Technical Specifications

|                          |                            |
|--------------------------|----------------------------|
| Range                    | 0 to 1000 mm               |
| Resolution               | 0.001/0.005 (selectable)   |
| Accuracy                 | $\pm 0.015$ per 1 meter    |
| Microscope Magnification | 20X*                       |
| Overall Dimension        | approx 1500 x 300 x 400 mm |

Note : \*Different Microscope magnification optionally available on request.  
Design Subject to change to enable us to offer better product.

DRO

Optional NABL  
Certification at  
extra cost

Calibration certificate traceable to National / International standards provided for instrument & accessories

Manufactured, Sales & Service By :

**ADITYA ENGINEERING COMPANY, PUNE, INDIA.**

Authorised Distributor :

### An ISO 9001:2008 Certified Company

Head Office : Gauge House, First Floor, 67, Hadapsar Ind. Estate, Pune 411 013, India.
